Summary

1. Overall Operations

The dashboard provides a high-level view of the fleet's capacity, revenue, and customer satisfaction metrics.

Scale & Capacity: The service operates a fleet of 8 vehicles and employs 8 drivers. Across its network, it manages 10 total routes with a combined capacity of 92 seats.

Customer Satisfaction: There is a notable gap in ratings; while the average driver rating is relatively high at 4.27, the overall average trip rating is much lower at 3.46.

Financials: The total revenue displayed on the dashboard is 41,595.

2. Route Performance

The route data reveals contrasting trends between popularity, profitability, and reliability.

Most Popular: Based on seat bookings, RT005 is the most popular route, followed closely by RT007 and RT010.

Cancellation Rates: Route RT001 suffers from the highest cancellation rate at 19.7%. Routes RT002 and RT008 tie for the second-highest at 15.2% each. Conversely, routes RT004, RT010, and RT006 are the most reliable, sharing the lowest cancellation rate of 4.5%.

Fares: RT001 is listed as the highest-fare route, despite its high cancellation rate.
